

Sample usage of umsCodeGenerator

Table of contents

1 Sample Files	2
----------------------	---

1. Sample Files

Schema of Input	xmlfits-input-20040825.r	Input Data	xmlfits-input-20040825.xml (xmlfits-input-20040825.XML)
mapping definition	xmlfits-input-20040825.u		
Schema of Output	xmlfits-input-20040825-f	Output Data	xmlfits-input-20040825.head (only FITS header)

A **mapping definition file** can be created from **schema of input** and **schema of output**. On the other hand, **mapping definition file** can be split into **schema of input (description of external data)** and **schema of output (description of interface with program language)**.
